Request for Confidentiality**

Dear Ms. Dortch:

John Staurulakis, Inc. ("JSI"), on behalf of its client, Etex Telephone Cooperative, Inc. ("Etex" or "the Company"), hereby requests, pursuant to Section 0.459 of the Commission's rules,¹ withholding from public inspection certain information contained in an attachment to the report submitted in fulfillment of the above-referenced reporting requirement. The Company provides the following in support of its request, numbered consistent with the subparagraphs of Section 0.459(b).²

1. The information for which the Company is seeking confidential treatment is an attachment to the Company's annual reporting information pursuant to Sections 54.313 and 54.422 of the Commission's rules ("Report").³
2. Eligible Telecommunications Carriers ("ETCs") must file with the Commission the reporting information which is contained in the attachment to the Report pursuant to Sections 54.313 and 54.422 and as specified in the August 6, 2013 Public Notice.⁴
3. The information contained in the attachment to the Report for which Etex seeks the withholding from public inspection is data pertaining to the Company's outages provided at FCC Form 481 attachment Line 200, Service Outage Reporting.

¹ 47 C.F.R. § 0.459.

² 47 C.F.R. § 0.459(b)(1) through (9).

³ 47 C.F.R. §§ 54.313, 54.422.

⁴ See *Wireline Competition Bureau Announces Filing Deadline of October 15, 2013 for Eligible Telecommunications Carriers to File High-Cost and Low-Income Annual Reports, and Announces Filing Deadline of December 16, 2013 for States and ETCs to File Annual Use Certifications*, DA 13-1707 (rel. Information of this nature is confidential commercial information routinely withheld from public inspection.

4. With respect to identifying the degree to which the attachment concerns a service that is subject to competition, the information pertains to the network and operations of a telecommunications company that has competitors that could benefit if they were able to have access to this information.
5. With respect to identifying possible exposure to competitive harm, the information contained in the attachment is information that is not customarily released to the public. Because the telecommunications market is highly competitive, release of this information could substantially harm the Company's telecommunications business.
6. With respect to steps the Company has taken to ensure against unauthorized disclosure of the information contained in the attachment, the Company is filing the attachment under seal. The attachment has also been filed with the Texas Public Utility Commission under seal.
7. Any previous versions of this information are not publicly available.
8. Because the information is not routinely available, a need exists for maintaining the confidentiality of this information permanently.
9. The Commission has previously concluded that there is a presumptive likelihood of substantial competitive harm from disclosure of outage information.⁵ The Commission also determined the disclosure of outage reporting information to the public could present an unacceptable risk of more effective terrorist activity and could therefore result in potential harm to the public and the national defense.

Based on the preceding, JSI respectfully requests on behalf of the Company that the Commission grant confidential treatment under Section 0.459 to FCC Form 481 attachment at Line 200, Service Outage Reporting. Please contact the undersigned with any questions regarding this request.

Sincerely,

John Kuykendall

Response to Lines 500-510 - Service Quality Standards and Consumer Protection Rules

Compliance

In establishing this certification in its *2005 ETC Order*,¹ the FCC found that an ETC must make “a specific commitment to objective measures to protect consumers.”² The FCC found that for wireless ETCs, compliance with CTIA’s Consumer Code for Wireless Service would satisfy this requirement” and that the sufficiency of other commitments would be considered on a case-by-case basis.³ In this context, the FCC stated, “to the extent a wireline or wireless ETC applicant is subject to consumer protection obligations under state law, compliance with such laws may meet our requirement.”⁴

Etex Telephone Cooperative, Inc. (“Cooperative”) hereby certifies that it complies with applicable service quality standards and consumer protection rules under the Texas Administrative Code, Title 16, Part II, as established by the Public Utility Commission of Texas. These obligations include, but are not limited to, the following: (1) filing a Local Exchange Tariff which discloses rates, terms and conditions of service to customers pursuant to Subchapter J requirements in Sections 26.201-26.230; (2) adherence to state consumer protection requirements governing telephone providers as identified in Subchapter B, in Sections 26.21-

¹ *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Report and Order, FCC 05-46 (rel. Mar. 17, 2005) (“*2005 ETC Order*”).

² *Id.* at para. 28.

³ *Id.* The FCC noted that under the CTIA Consumer Code, wireless carriers agree to: “(1) disclose rates and terms of service to customers; (2) make available maps showing where service is generally available; (3) provide contract terms to customers and confirm changes in service; (4) allow a trial period for new service; (5) provide specific disclosures in advertising; (6) separately identify carrier charges from taxes on billing statements; (7) provide customers the right to terminate service for changes to contract terms; (8) provide ready access to customer service; (9) promptly respond to consumer inquiries and complaints received from government agencies; and (10) abide by policies for protection of consumer privacy.” *Id.* at n. 71.

⁴ *Id.* at n. 72.

26.37; and (3) service quality standards requirements as identified in Subchapter C, Sections 26.51 -26.57.

In addition, the Cooperative complies with numerous federal consumer protection standards including, but not limited to: (1) Truth-in-Billing Rules outlined in 47 CFR § 64.2401; and (2) compliance with Federal CPNI rules, Red Flag Rules and other applicable federal and state requirements governing the protection of customers' privacy.

Response to Lines 600-610 - Ability to Function in Emergency Situations

Etex Telephone Cooperative, Inc. ("Cooperative") hereby certifies that it is able to function in emergency situations as set forth in the Code of Federal Regulations, Title 47, Part 54, Subpart C, §54.202(a)(2)¹ and the Texas Administrative Code. The Cooperative's network is designed to remain functional in emergency situations without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations as required by Section 54.202(a)(2). The Cooperative can change call routing translations as needed to reroute traffic around damaged facilities. Changing call routing translations also allows the Cooperative to manage traffic spikes throughout its network, as emergency situations require.

Specifically, the Cooperative is able to function under emergency operations in accordance with Public Utility Commission of Texas Substantive Rules §26.51 *Reliability of Operations of Telecommunications Providers* and §26.52 *Emergency Operations* which include obligations for continuity of service and emergency operations planning and service provision capability for dominant carriers. Any central office not equipped with permanently installed standby generators contains as a minimum four hours of battery reserve without voltage falling below the level required for proper operation of all equipment. In addition, all central offices without installed emergency power facilities have a mobile power unit available which can be delivered and connected on short notice.

¹ Section 54.202(a)(2) requires ETCs that are designated by the Commission to "demonstrate its ability to remain functional in emergency situations, including a demonstration that it has a reasonable amount of back-up power to ensure functionality without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations."
